

# Default address type for an address

## What it does:

---

This table allows you to set the default address type that should appear when a person is entering a new address for someone.

## Adding the table entry

---

Menu | Tables | Generic Validation Tables | Defaults

---

Code: [ADDRESSTYPE](#)  
Short description:\*   
Long description:\*   
Active:\*  Yes  No

The short description should be the code from the table: [AddressType](#) that you want as the default address type when a new address is added. If you do not want a default address type you can put a U or any other code that doesn't exist or make the table inactive.
