

Default Alias Type entry

What it does:

Allows you to set the default alias type when merging two names. The name you merged is added as an alias of the name you merged it into. This defines what type of alias that name will be.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: ALIASTYPE
Short description:* AKA
Long description:* Default AliasType entry
Active:* Yes No

The short description is the code from the Table: [AliasType](#) that you wish to be your default.

Alias type:* AKA - Also/Formerly Known As ▼
First name:
Middle name:
Last name:*
Generation: -- Select -- ▼
