Judge approval prior to file stamp (Y/N)

What it does:

If a document has a Motion and an Order on the same document for example, this table lets you set what happens first, does it get file stamped first or does it to go the Judge for approval first.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: APPROVEFIRST
Short description:* Y
Long description:* Judge approval prior to file stamp (Y/N)
Active:* ● Yes ○ No
Notes:
If a document needs to be both approved by the judge and file stamped, which will happen first? If the judge approval should happen first, set the short description to 'Y', otherwise set it to 'N'.
