

Automatically select lives with on add of address

What it does:

This controls the automatic feature that selects relatives who “live with” a person when an address is added or updated so their address is updated as well. If N, no relatives will be automatically selected. If Y, those relatives who live with the person will be automatically selected so their address can also be updated.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: **AUTOSELLIVewith**

Short description:*

Long description:*

Active:* Yes No

Notes:

Automatically select relatives who 'live with' a person when the add screen for an address is first displayed.

Short description should be 'y' if you want to, 'n' if you don't.
