

# Authorized Schools:

Menu | Tables | Authorized Schools

This is where you can give access to specific schools to specific people. For this to work, they must not have display access to the authority table “Authorized to view all schools.” If they can’t see all schools, it will check the Authorized Schools list to see which schools they are authorized to view.

Authority	<b>Authorized to view all schools</b> Must have display authority to this in order to view case/person related information on people regardless of their current school association. Without this, the AuthorizedSchools database file will be checked to determine whether a person may view the information.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
-----------	---	--------------------------	--------------------------	--------------------------	-------------------------------------

You give them access to the schools you wish them to view.

## Authorized Schools

Ronald F. Kammeyer

Not currently authorized to use Quest - entries here won't matter

---

- Abbett Elementary School (FWCS)
- Aboite Elementary School (SACS)
