# Change Document Names (Y/N)

## What it does:

Provides a line below the template name so you can name the document whatever you want rather than just accepting the template name.  For example:  the template may be named Diversion/Adjudicatory/Dispositional Order because it works for all these scenarios, but you want the finished document to read Dispositional Order.

## Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: CHANGEDOCNAME
Short description:* Y
