Case types to display on criminal history

What it does:

The Criminal History tables allow you to customize the types of cases that will appear when you use the FF CR HIST template functions.   For example, you may not want a paternity or dependency case to appear on the criminal history.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

```
              Code: FF CR HIST/00
Short description:* Criminal Hist
 Long description:* Case types to display on criminal history
           Active:*  ● Yes ○ No
Notes:
# Specify case types to display on criminal history in this mode.
# If none specified, all case types will display

#type.1=jd
#type.2=js
#type.3=jm

type.1=JD
type.2=JS
type.3=JM
type.4=JMNS
type.5=JMS
```

There are multiple tables, each correspond with the template function of the same name.

FF CR HIST/00	Criminal Hist	Case types to display on criminal history
FF CR HIST/01	Criminal Hist	Case types to display on criminal history
FF CR HIST/02	Criminal Hist	Case types to display on criminal history
FF CR HIST/03	Criminal Hist	Case types to display on criminal history

Code: FF CR HIST/03

Short description:* Criminal Hist

Long description:* Case types to display on criminal history

Active:* ● Yes ○ No

Notes:

```
# Specify case types to display on criminal history in this mode.
# If none specified, all case types will display

#type.1=jd
#type.2=js
#type.3=jm

# Skip the case number when outputting the history
skipCaseNbr=n

# Cases in ascending sequence
ascending=n

# Header to display before a name
# header=Juvenile History for
```
