

Case status follow-up stats

Report Description:

This report allows you to choose a specific case status, such as adjudicated. It will then report how many cases had that case status before the reporting period, how many new cases came in during the period, how many were closed during the period, and how many cases had that case status at the end of the period. It will also report if the person has a new offense during or after the status was active.

Running the Report:

Choose the case status you wish to track. Select the start and end date of the period. You can narrow the report to only include specific race, sex, and age if desired. If you wish to see the list of cases that the report is reporting, choose yes for show details.

Total	72		416		439		49		15	3.42	0	0.00	0	0.00

The report will look for any case with the matching case status that has a status date that started prior to the ending of the requested period.

Start is when the case status was issued.

End is when the next status occurs. If no end, we use 90 days.

To be included in the report, the end must be before the start or the requested period.

Therefore, the status was active sometime during the requested period (start before the period end and end before the period start).

Start of Period - how many of the statuses did we have active at the start of the period.

Entries - how many new ones did we get during the period.

Exits - how many ended during the period.

End of Period - how many do we have active at the end of the period.

FTA Exits - ended during the period and had an FTA while the status was active. If it was a reoffense exit (below), the FTA doesn't count.

Reoffense Exits - ended during the period and had a new offense while the status was active.

Reoffense After - ended during the period and had a new offense after the status was active.
