

Default document assignments

What it does:

This table allows you to identify the next person who will be responsible for a document. For example, if you have multiple Magistrates that report to multiple Judges, you can assign each Magistrate to their Judge here so when the Magistrate finishes an order it goes to the appropriate Judge for approval.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: DOCASSIGNMENTS
Short description:* DocAssignments
Long description:* Default document assignments
Active:* Yes No

Used to default the identity of the next person who will be responsible for a document.

The defaults are based either on the userID of the judge/magistrate assigned to the document OR the name of the variable within the template. You could have a 'CLERK' variable or 'PROSECUTOR' variable for example and have a corresponding entry here.

NOTE: THIS IS A PROPERTIES FILE. EACH ENTRY MUST BE CAPITALIZED AND ON ITS OWN LINE.
