

Model Court Dependency Statistics

Report Description:

This report will provide the number of new dependency petitions filed for the reporting year. It will average that caseload for the number of judicial officers who hear these cases. It will list the number of children under the court jurisdiction and in out of home placements. It will show how many achieved permanency and the type, the number of orders terminating parental rights, the number of appeals and the length of time for many points in the case. It will also provide recidivism numbers.

Where the data comes from:

The report will look for cases that have people with specific roles as defined in the report settings under “role.”

It will then search the search sections.

It searches the different case types as defined by the report settings “guardianCaseType” “abuseCaseType” “tprCaseType” and “adoptCaseType.”

It searches for the different case status options that mean “reunification,” “adoption,” “relativePlacement,” “otherPlacement,” “livingArrangement,” “collaborativeCare,” “adjudication,” “disposition,” “removed,” “guardianshipSubsidized,” and “deceased.”

It will also look at the case status to determine if an adoption happened “finalized” or didn’t happen “disrupted.”

It will search docket codes to determine if a case has been appealed “appealedAttribute”, if the appeal was reversed “reversedAttribute” and if the appeal was upheld “upheldAttribute.” It will also search docket codes to determine that the child was not initially removed from the home “notRemoved”

It will look at events to report on review hearings “review” and permanency hearings “permanency.”

It will look at requirements to determine placement “placement” and

It will try to determine if a TPR was authorized by looking at templates “tprTemplate” or a case status “tprCaseStatus.”
