People with Both Delinquency and Dependency Cases

Report Description:

This report will identify these children:

Dually identified Youth - Youth who are currently involved with the juvenile justice system and have history in the child welfare system but no current involvement (or vice versa)

Dually-Involved Youth – Youth who have concurrent involvement (diversionary, formal, or a combination of the two) with both the child welfare and juvenile justice systems.

Dually-Adjudicated Youth – Youth who are concurrently adjudicated in both the child welfare and juvenile justice systems (i.e. both dependent and delinquent).

Running the Report:

Select which group of people you wish to identify.

As of date – One of the cases had to be open after the as of date.
Thru date – Looks at the case status of the cases that happened through the end date.

If you put today through today it will provide a list of people with at least one open case with a history of the other type of case as of today. If you put in a date range of last quarter for example, it will provide a list of children who had at least one case open sometime during the last quarter although all cases may be closed as of today.

People With Both Delinquency And Dependency Cases
Enter report criteria and press "Submit"

Show when at least one case is open: ◉ Yes ◯ No
Show when both cases open: ◉ Yes ◯ No
Show when both are currently adjudicated: ◉ Yes ◯ No
As of date: 10/5/2018
Thru date: 10/5/2018

The Report:

This report will produce both a .pdf and a .csv spreadsheet document. The .pdf report is broken into 3 different sections.

Where the data comes from:

The report will go through the open cases as defined in the report settings, "delinquencyCaseType" and "dependencyCaseType" to determine if a person has at least one of each.

In those cases, such as JM, which could be either a delinquency or dependency case, as defined in the report setting "couldBeEitherCaseType" the report will check the severity of the incident or filed statute as defined in the report setting "dependencyStatuteSeverity" to determine in which group it should be included. In Indiana the JM case type is used for an informal adjustment in both delinquency and dependency. If a statute is not found, it will be reported as a delinquency.

Report Settings:

```
# -- Required settings --
class=equest.app.reports.DuallyIdentified

# Case types to only count as deliquency
# delinquencyCaseType.n=CASETYPE
delinquencyCaseType.1=JD
delinquencyCaseType.2=JS

# Case types to only count as dependency
# dependencyCaseType.n=CASETYPE
dependencyCaseType.1=JC

# Case types that could be either delinquency or dependency
# couldBeEitherCaseType.n=CASETYPE
couldBeEitherCaseType.1=JM

# If could be either, statute severity that indicates dependency
# We check both filed and incident statutes
# dependencyStatuteSeverity.n=SEVERITY
dependencyStatuteSeverity.1=C
