

# Event attribute inquiry

## Report Description:

This report looks at the different event attributes and produces a report that tell you how many times this attribute was used and in which case. It can be narrowed by specific event types, event dates, or even by agency, division, unit, or user id.

## Running the Report:

The attribute section is the only required section.

If you wanted to pull events from a non-court event, such as a probation office appointment, you could select the agency, division, unit, or even a specific user to narrow the results to only their events.

If you only want to search for a specific date range of events, you can add the event after and before dates.
