

FF CASENAMES

What it does:

Formats the case names, names assigned to the case, and relatives in a format that is helpful for what could be called "Judge's Notes." It can be produced as a batch, so you could run it for a court docket and get a check list of everyone on the case.

Used in template:

FF CASENAMES/00 – Format case names & active assignments

Formats all case names and active case assignments for all cases tied to a document. Each name is listed along with their role in the case, age, race, sex dob, ssn, address (unless the variable name ends with a '-'), phone number and employer. First case names are listed then case assignments.

NOTE: You may start the prompt with the following line(s) to limit the names to only the roles listed (there can be multiple lines of each type below):

roleInCase=ROLE IN CASE

assignedRole=ASSIGNED ROLE

In this mode, there will be a '()' before each name.
