FF COURT

What it does:

Allows you to use the assigned/home court to put information based on that court into your documents. This is helpful when you have multiple court locations.

Used in template:

Template

```
@v/select/

<span class="b">YOU ARE FURTHER NOTIFIED AND COMMANDED</span> to appear before the Judge
of the @v/court/, @v/courtadd/ for
```

Variables

Name	Type	Action	Length	Prompt
COURT	@V/	FF COURT/01	1	Long description of the assigned/home court
COURTADD	@V/	FF COURT/05	1	Address of the assigned/home court
SELECT	@V/	FF CMPLNTS/00	1	x

This is all based off the Assigned/home court of the case.

Case type:* JT - Termination of Parental Rights ▾

Access:* ● Normal ○ Confidential ○ Sealed   E

Assigned/home court: 75 - Starke Circuit Court

What the user sees:

The user won't see anything, this is automatic.

Output:

YOU ARE FURTHER NOTIFIED AND COMMANDED to appear before the Judge of the Starke Circuit Court, 53 East Washington Street, Knox, IN 46534 - 574-772-9147 for

FF COURT/00 – Court assigned to first case - short desc

The purpose of this function is to return the short description of the assigned court of the first case (with an assigned court) tied to the document

FF COURT/01 – Court assigned to first case - long desc

The purpose of this function is to return the long description of the assigned court of the first case (with an assigned court) tied to the document

FF COURT/02 – Court assigned to first case - court type

The purpose of this function is to return the type of assigned court for the first case (with an assigned court) tied to the document. To determine the court type, each court entry must have a corresponding entry in the DEFAULT table of the generic validation tables. It will return the short description of the DEFAULTS entry.

Code	Short description	Long description
Add a new entry		
01	01C	Adams Circuit Court
02	02D	Allen Superior Court
75	75C	Starke Circuit Court

The Assigned/Home Court code and the Default table code must match.

FF COURT/03 – Court assigned to first case - judge name

The purpose of this function is to return the name of the judge for the first case (with an assigned court) tied to the document. To determine the judge's name, each court entry must have a corresponding entry in the DEFAULT table of the generic validation tables. In the notes of the DEFAULTS entry should be 'judgeID=xxx', where xxx is the user id of the judge.

Code: 02
Short description:* 02D
Long description:* Allen Superior Court
Active:* ● Yes ○ No
Notes:
judgeID=cpratt

FF COURT/04 – Court assigned to first case - judge signature

The purpose of this function is to return the signature of the judge for the first case (with an assigned court) tied to the document. To determine the judge's signature, each court entry must have a corresponding entry in the DEFAULT table of the generic validation tables. In the notes of the DEFAULTS entry should be 'judgeID=xxx', where xxx is the user id of the judge.

FF COURT/05 – Court assigned to first case - address

The purpose of this function is to return the address for the first case (with an assigned court) tied to the document. To determine the address, each court entry must have a corresponding entry in the DEFAULT table of the generic validation tables. The address of the DEFAULTS entry should be the address you want printed.

The default table code must have an address and contact number added.
