

# FF HEARING

## What it does:

This function formats hearing dates and times. You can select from future events, current events, the last event, all events, court only events, with the court, without the court, etc.

## Used in template:

Template				
<code>&lt;li&gt;This matter shall be scheduled for @v/event-/.&lt;/li&gt;</code>				
Variables				
Name	Type	Action	Length	Prompt
EVENT-	@V/	FF HEARING/13	1	Select the next hearing. If it is not scheduled please add it.

## What the user sees:

If you have chosen a function that shows all hearings, you will see past hearings as well as future hearing. In this instance (HEARING/13) where you are saying to select the NEXT hearing, you can limit the list to only future hearings.

Select the next hearing. If it is not scheduled please add it.

## Output:

---

- `This matter shall be scheduled for October 25, 2018 at 8:30 AM.`

### This option appears in all functions.

NOTE: If the variable ends with a '-', then the court or agency will not be included.

NOTE: You can skip specific event types and/or courts in the list, as well as either all past events or events older than a given number of days prior to today, by starting the prompt with one or more of the following lines (the lines will be removed from the prompt when presented to the user):

`skipEventTypes=aaaa bbbb cccc`

`skipCourts=xxxx yyyy zzzz`

`skipPastEvents=y`

`priorDays=nnn`

NOTE: In kiosk mode, won't show any links and automatically selects all entries. User can't change selections.

### FF HEARING/00 – Select future court event/hearing - string; short

---

This function is used to present **a list of future court events** and allow the selection of 1 or more. The SHORT description of the court room will be used. The information will be formatted as follows:
