FF SELPRPT/00 – Select agency report number

This function lists all incidents for each personID/caseID tied to the document. It allows the selection of a single incident, whose agency report number will be output.

FF SELPRPT/01 – Select agency report number - auto if found

This function lists all incidents for each personID/caseID tied to the document if none of the incidents already have an agency report number. Otherwise, it returns the first agency report number it encounters. When displaying incidents, it allows the selection of a single one, but would return spaces since the incident doesn't have an agency report number.

FF SELPRPT/02 – Agency report number - first one found

This function searches incidents for each personID/caseID tied to the document. It automatically returns the first agency report number it encounters, if any.
