

Rule GAW014 – Send Email for Documents

Apply when:*

Subtask:*

Standard GAWDBObject subtasks:
'C' - on object creation
'R' - before referential integrity
'i/I' - before/after insert
'u/U' - before/after update
'd/D' - before/after delete

Sequence: (Controls the order in which rules will be applied for a given subtask)

Java class:*

Sends an email or fax if possible to all active case assignments for the names tied to a document letting them know about the document. It also updates the fact that notice was sent to these people. The FAX entry of the defaults table must be set up for this to work. It should be called from the Documents object. While it could be called for any request, it makes the most sense to call it with either 'a' (upon completion) and/or 'A' (when the document is approved/rejected).

It is possible to skip sending emails for documents that need approval or need file stamp until that event happens. If you do this, make sure to add the rule to those events on the document so people get notice when that happens. You set this in the settings in the RuleParms entry of the Defaults table.

Valid properties are:

```
SendEmailForDocuments.skipUntilApproval=<y/n>  
SendEmailForDocuments.skipUntilFileStamp=<y/n>
```

Rule Setup:

Apply when	Sub-task	Seq	JAVA class
<u>Documents</u>	a	6	equest.rules.SendEmailForDocuments

Rule Parms:

```
SendEmailForDocuments.skipUntilApproval=y  
SendEmailForDocuments.skipUntilFileStamp=y
```
