

## Rule GAW065 – Send Email for Documents 2

---

Apply when: Documents database file  
Subtask: a  
Standard GAWDBObject subtasks:  
'C' - on object creation  
'R' - before referential integrity  
'i'/'I' - before/after insert  
'u'/'U' - before/after update  
'd'/'D' - before/after delete  
Sequence: 8 (Controls the order in which rules will be applied for a given subtask)  
Java class:\*

Sends an email to the desired parties about the passed Documents object. If a DocumentNames object is passed, the message refers to the underlying Documents object. It also updates the fact that notice was sent to these people. The FAX entry of the defaults table must be set up for this to work. While it could be called for any request from the Documents object, it makes the most sense to call it with either 'a' (upon completion) and/or 'A' (when the document is approved/rejected). The parties who receive the message are determined by the settings in the 'RULEPARMS' entry of the 'DEFAULTS' table. Valid properties are:

SendEmailForDocuments2.template.xxxxx.n=<email address>  
this will send an email to the address specified of what happened to the document.  
xxxxx is the lowercase template id  
n must start at 1 and increment by 1 for each entry specified.

SendEmailForDocuments2.docketcode.xxxxx.n=<email address>  
this will send an email to the address specified of what happened to the document.  
xxxxx is the lowercase docket code  
n must start at 1 and increment by 1 for each entry specified.

### Rule Setup:

Apply when	Sub-task	Seq	JAVA class
<a href="#">Documents</a>	a	8	<a href="#">equest.rules.SendEmailForDocuments2</a>

### Rule Parm:

SendEmailForDocuments2.template.\*mrtr.1=veronika.wristpus-ortiz@acjc.us  
SendEmailForDocuments2.template.\*mrtr.2=gregory.peters@acjc.us  
SendEmailForDocuments2.template.\*mrtr.3=cheryl.bartnick@acjc.us
