Rule GAW107 – Secure Contact

Apply when:* CONTACTS - Contacts database file

Subtask:* C

Standard GAWDBObject subtasks:
'C' - on object creation
'R' - before referential integrity
'i'/'I' - before/after insert
'u'/'U' - before/after update
'd'/'D' - before/after delete

Sequence: 3 (Controls the order in which rules will be applied for a given subtask)

Java class:* GAW107 - equest.rules.SecureContact

This rule is designed to limit access to contacts of specified types.
If a contact is being secured, in addition to the regular authority to access it, the user must be in the same agency as the person who created the contact.
This rule is intended to be used upon creation ('C') of the Contacts database object.
A NotAuthorizedException is thrown if an attempt is made to access a secured object by a non authorized person.

The contact types to be secured a determined by the settings in the RuleParms entry of the Defaults table.

Valid properties are:
SecureContact.n=<contact type>

Rule Setup:

Apply when	Sub-task	Seq	JAVA class
Contacts	C	3	equest.rules.SecureContact

Rule Parms:

SecureContact.1=HV
