

Rule GAW112 – Document Note to Contact

Apply when: Document notes database file

Subtask: I

Standard GAWDBObject subtasks:

'C' - on object creation

'R' - before referential integrity

'i'/'I' - before/after insert

'u'/'U' - before/after update

'd'/'D' - before/after delete

Sequence: 1 (Controls the order in which rules will be applied for a given subtask)

Java class:*

Creates a contact when a document note is completed by a particular person. Copies the document note to the contact note.

It is really intended to be used during insert/update of the DOCUMENTNOTES database file. It uses the 'RULEPARMS' entry of the 'DEFAULTS'.

Valid properties are:

DocumentNoteToContact.personType.n=<person type making the note>
where n starts at 1 and is incremented by 1 for each person type defined.

DocumentNoteToContact.contactType=<contact type>

DocumentNoteToContact.contactPerson=<contact person>

The rule will first look for a person type entry that matches the person type of the user making the document note. If it can't find one, no contact note will be added.

Rule Setup:

Apply when	Sub-task	Seq	JAVA class
<u>Document notes</u>	I	1	equest.rules.DocumentNoteToContact
<u>Document notes</u>	U	1	equest.rules.DocumentNoteToContact

Rule Parm:

DocumentNoteToContact.personType.1=PRSU

DocumentNoteToContact.contactType=DOC

DocumentNoteToContact.contactPerson=O
