

## Rule GAW139 – Track SI Inventory

---

Apply when: Requirement sanctions/incentives database file

Subtask: d

Standard GAWDBObject subtasks:

'C' - on object creation

'R' - before referential integrity

'i'/'I' - before/after insert

'u'/'U' - before/after update

'd'/'D' - before/after delete

Sequence: 9 (Controls the order in which rules will be applied for a given subtask)

Java class:\*

This rule keeps the sanctions/incentives inventory field up to date (in the sanctions/incentives generic validation table).

This should only be called before 'i' and before 'd' of the RequirementSanctions database object. Only table entries with a numeric value in the inventory field will be updated. If the value is 0, an error is thrown.

### Rule Setup:

Apply when	Sub-task	Seq	JAVA class
<a href="#">ReqSanctions</a>	d	9	<a href="#">equest.rules.TrackSIInventory</a>
<a href="#">ReqSanctions</a>	i	9	<a href="#">equest.rules.TrackSIInventory</a>
