

Settings for kiosk

What it does:

Allows you to configure a kiosk for public access to Quest. Contact G&W if you want to set this up in your jurisdiction.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: KIOSK

Short description:*

Long description:*

Active:* Yes No

```
# The following lines need to be placed in quest properties for each ip address where it should work
# ip address.kiosk.jurisdiction=<jurisdiction>
# ip address.kiosk.userID=<user id>
# ip address.kiosk.password=<password>
```

```
# To run the kiosk in Chrome, create a Chrome shortcut on your desktop. Then, alter the properties of
the target by adding the following to the end:
-kiosk https://yoururl/equest/quest?cmd=kiosk
```

```
# To run the kiosk in IE, create an IE shortcut on your desktop. Then, alter the properties of the target
by adding the following to the end:
-k https://yoururl/equest/quest?cmd=kiosk
```

```
# active requirement type, type/code, or type/code/attribute that must exist (if none specified, then
won't be checked)
# requirement.n=<TYPE> or <TYPE/CODE> or <TYPE/CODE/ATTRIBUTE>
requirement.1=CC/CA12
```

```
# template to be used based upon requirement type, type/code, or type/code/attribute found
# template=<default template if not found below>
# template.<TYPE or TYPE/CODE or TYPE/CODE/ATTRIBUTE>=<template>
template=F-KIOSK
```
