

Map information

What it does:

Allows you to customize the mapping interface for your jurisdiction. You can tell the map where the center of the map should be and set the initial zoom level of the map.

Adding the table entry

[Menu](#) | [Tables](#) | [Generic Validation Tables](#) | [Defaults](#)

Code: [MAPINFO](#)

Short description:*

Long description:*

Active:* Yes No

Notes:

```
# Specifies information necessary to customize the mapping interface.
// where to place the center of the map - can use zip or city/state or
full address
centerLatitude=41.093
centerLongitude=-85.023

// initial zoom level of the map
zoom=12
```
