

# Quest Monthly Meetings

GKT Consulting, Inc. is partnering with the AOC in a Data Quality Project. This project looks for ways to improve the quality of the data we are keeping in Quest. Part of improving data is making sure the Quest counties are adding data in a consistent way and to then provide additional training if needed.

We hold a monthly zoom meeting with Quest users to discuss best practices, share new ideas, ask questions of each other, and even have special speakers to share information.

This is a 60-minute meeting, held once a month, with a set agenda. We start each meeting with a helpful tip about using Quest, a segment called "Fun with Quest." We then discuss a chosen topic, such as the topics listed below. Following each meeting will be a survey so you can make comments on the effectiveness of that meeting and make suggestions for the next meeting.

In case you missed any of the past meetings you can catch up here. Click the blue link to access the information.
