

Next events for requirements

Report Description:

This report will list cases with a specific requirement type or code and tell you the next event on the case. For example, you can specify a certain requirement, such as "DCS Commitment" or a "DCS Placement" to limit the report those children who have been removed from the home. Then you can pull this report to ensure these cases have a future event scheduled.

Running the Report:

You can run this report for only court events, only non-court events, or both. If you chose no for both, you still get a report with a list of all the cases, but it doesn't show any events.

Include Court Events:* Yes No
 Include Non-Court Events:* Yes No

The Report:

The report will list the event names, file and case number, the matching requirement defined, and the next event or the last event if there isn't a next event scheduled.

Where the data comes from:

If a requirement type and/or code is defined in the report, this report will only look for those cases with an open requirement that matches the report settings.

If the report settings specify to limit to a specific court, it will look for only those events that are scheduled for that matching court.

If we are limiting to a specific event, it will only look for those specific event types.
