Next events

Report Description:

This report will show the next selected event on cases. It will list the probation status, on probation or not, the supervision level and the date of the future event. This is a great report to ensure cases with a specific supervision level have their next "office visit" scheduled for example.

Running the Report:

Enter the event type you wish to view.
You can run this for the agency, division or unit. You can also only run it for a particular Quest user.

If you include the entire case load, it will include everyone on that caseload regardless of whether they have this event scheduled in the future or not. If you say no, don't include the entire caseload, the report will only show those people where there is a future event of this type scheduled.

The Report:

The report will produce a page for each Quest user that matches the criteria entered.

Hi ntrae	106929	1	On probation	Low	2/1/2019
To	100681	2	On probation	Low	2/1/2019

Where the data comes from:

The report will search the caseload of each Quest user that matches the report criteria. It will then sort and report as instructed. It will look for an event that matches the event type selected. If found it will report the date of that next event. If you selected to include the entire caseload, it will list all cases regardless of whether they have this future event scheduled.
