

Open requirements by school

Report Description:

This report provides a list of the names and identifying information for all people with a specific open requirement. The report is separated by the name of the school they are currently attending. If the child is not currently attending a school, the report will provide a list of these children as well.

Running the Report:

Select the agency or user ID.

Select the requirement type and/or code.

Select a provider if desired. If none are selected all providers will be included.

Select a school if desired. If none are selected all schools will be included.

Open Requirements By School

Enter report criteria and press "Submit"

ie specified

Where the data comes from:

The report will search all cases for an open requirement that matches either the report settings “[requirementType](#)” or “[requirementCodes](#).” It will then list all the names assigned to the case that are from the agency specified. It will then break down the results by the school the child is currently attending or will put them in a section with no school specified.

Report Settings:

```
# -- Required settings --
class=equest.app.reports.OpenRequirementsBySchool
jobQ=batch

# You can schedule this job in batch.
# Simply specify any variable as varname=value
# Instead of requirement, use:
# requirementType=valid type
# requirementCode=valid code (this is optional though)

# You can specify a final line of text on each section, based upon the requirement type selected.
# Note <type> must be the lowercase code for the requirement type in question
# finalText.<type>=Whatever you want to say on a single line
