

Password validation properties

What it does:

Allows you to configure passwords. Do they have a minimum length, need an alpha character, numeric character, special character? And when we set the default password (their user id in all caps) does it force them to immediately change it?

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: **PASSWORD**

Short description:*

Long description:*

Active:* Yes No

Notes:

```
# Minimum length of password. 0 signifies no minimum length.
minimumLength=8

# Should there be at least 1 alpha character (a - z) - Y or N.
mustHaveAlphaChar=y

# Should there be at least 1 numeric character (0 - 9) - Y or N.
mustHaveNumericChar=y

# Should there be at least 1 special character (!, @, #, $, %, ^, or
*) - Y or N.
mustHaveSpecialChar=y

# Force default password to be changed - Y or N
changeDefault=y
```

How frequently a password must be changed is configured in the Report: [CHECKPASSWORDS](#).
