

Quest User Group
Meeting

September 9, 2021
September 14, 2021

HI!

1

This slide features a dark blue background with a light blue wavy graphic at the top. The title 'Quest User Group Meeting' is in a light blue font. Below it, the dates 'September 9, 2021' and 'September 14, 2021' are listed. On the left, a cartoon character with glasses and a blue shirt waves, with an orange speech bubble containing the text 'HI!'. A small number '1' is in the bottom right corner.

1

Form Functions

This is the stuff that makes your documents do automatic things for you!

2

This slide has a white background with a light blue wavy graphic at the top. The title 'Form Functions' is centered in a dark blue font. Below the title, on the left, is a small square image of the same cartoon character. A blue speech bubble points from the character to the text: 'This is the stuff that makes your documents do automatic things for you!'. A small number '2' is in the bottom right corner.

2

FF Address

- Changed modes 00 thru 03 – added ability to show all active addresses instead of just the latest address (Coffee Adult)

Start the prompt with `allActive=y`

This is helpful if your person has a mailing address, work address, and home address; and you want to choose which address to mail your letter to.

3

3

FF Assess

- New mode 14 - Select assessments – total score only (Owen)

This function is used to list the assessments for the people tied to the document. Assessments may then be selected. Only assessments selected, will be reported. It is really intended for a single selection though. They will be formatted as follows:

10

Useful if you just want to show what the total score of an assessment was, without all the details.

4

4

FF Assess-A

They used this to compare assessments for different children on one page.

- **New mode 00 – Assessments auto (BAYS)**
 Latest assessment for each personid tied to the document will be formatted as follows:
 NOTE: There will be 1 column for each personid tied to the document.
 NOTE: you can limit the assessments by starting the prompt with assessmentType.n lines.
 John Doe
 5/20/2021 10:00 am - Risk Assessment (Initial) - Score: 13; Result: Medium
 Domain A - 3: Low
 Domain B - 1: Low
 Domain C - 10: High

5

5

FF Assess-A

Same thing. Pretty Cool!

- **New mode 01 – Assessments auto – Names and scores only (BAYS)**
 Latest assessment for each personid tied to the document will be formatted as follows:
 NOTE: There will be 1 column for each personid tied to the document.
 NOTE: you can limit the assessments by starting the prompt with assessmentType.n lines.

John Doe

6

FF Assess-A

This function calculates the average

- New mode 02 – Assessments auto – Average score only (BAYS)
Average of the latest assessment for each personid tied to the document will be formatted as follows:

NOTE: you can limit the assessments by starting the prompt with assessmentType.n lines.

22.625

7

7

FF Assigned

- New mode 04 – Formats name/type/phone of worker assigned to doc (Coffee Adult)
This function is used to format the name, type and phone numbers of the of the worker currently assigned to the document. If FF PsnSeq/10 or FF Assigned/10 is used first, the worker id will be set. The output is formatted as follows:

Jane Doe, Attorney
Work: 123-456-7890

This is great if you are clerical doing a letter and you want the PO's information on it, not yours.

8

8

FF CasePlan

- Changed all modes – (Karlene)
 - If the prompt starts with **activeOnly**, it will skip outputting any sections where level of the case plan has a status.

This is so you can keep creating new sections in case plans and only have open information go into your document.

Show me!

9

9

FF Code

FF Code allows you to display the contents directly from the table, so you don't have to have @sel for all the options!!

- Changed mode 27 – Courts (Karlene)
 - Added ability to specify **officialOnly=y** to limit to official courts only in the list
- New mode 31 – Requirement Status (SBC)
- New mode 32 – Incident Type (Coffee Adult)
- New mode 33 – Statute Disposition (Coffee Adult)
- New mode 34 – Conspiracy/Attempt (Porter)

Show me!

Say what?

10

10

FF CR HIST

- Changed all modes – (Coffee Adult)
 - There's a Defaults entry with options for controlling each mode. Add 'skipIncidents=y/n' as an option.

Code: FF CR HIST/00

Short description:* Criminal Hist

Long description:* Case types to display on criminal history

Active:* Yes No

Notes:

```
# Specify case types to display on criminal history in this mode.
# If none specified, all case types will display

#type.1=jd
#type.2=js
#type.3=jm

#skip incidents in output (y/n)
skipIncidents=n
```

Sometimes showing both incidents and filed statutes is confusing

Show me!

11

11

FF CurHrg

This is great if you live on the edge of a time zone.

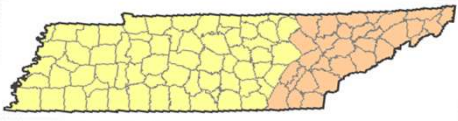

- Changed modes 00, 01, 03 – (Lake)
 - Can start the prompt with 'showTimeZone' to add the time zone to the output immediately following the event time.

The Court now sets a(n) Status Hearing on 8/25/2021 at 10:30 AM CDT in Court #3.

CST – Central Standard Time
CDT – Central Daylight Standard Time

12

12

FF Hearing

- Changed all modes – (Lake)

Can start the prompt with 'showTimeZone' to add the time zone to the output immediately following the event time.

Same as last screen. This works for the “current hearing” functions and the “select hearings” functions.

13

13

FF IDBlk

- Changed modes 00, 02, 03 – (Allen)

Can start the prompt with 'skipIntangible' to not include intangible physical identifiers in the output. NOTE: We'll discuss intangible physical identifiers later on.

This has to do with the new Dashboard button you see when you go to Supervision Dashboard

14

14

FF Oper

- New mode 20 – Assign document to the current user (Williamson)
Sets the identity of the next person who will be responsible for this document to the current user.

This assigns a document to....
YOU!

15

15

FF People

- Changed modes 02, 04, 05 – (Madison, IN)
Can start the prompt with `'lastEmployerOnly=y'` to only show the last employer for a person in the output.
- Changed mode 14 – (Allen)
Can start the prompt with `'skipIntangible'` to not include intangible physical identifiers in the output. NOTE: We'll discuss intangible physical identifiers later on.

This first one applies to Indiana. On your PI or PDR Report where you list mother, father, etc. with all their information. This will make it so it only lists the last employer instead of every employer they've ever had.

The second one applies to the dashboard I alluded to in the last screen.

16

16

FF PhoneL

- New – (Monroe)

This function is used to format contact numbers selected by the user of an identity tied to the form. If you want to only output the number, without the type, the variable must end with a '!'. An entry will look something like:

Home: 123-456-7890

Work: 317-471-9005

This allows you to
select a phone
number rather
than list all

17

17

FF Relatn

- Changed mode 33 – (Allen)

Can start the prompt with 'skipIntangible' to not include intangible physical identifiers in the output. NOTE: We'll discuss intangible physical identifiers later on.

More changes for this
dashboard. Coming soon...

18

FF Update

FF Update is the function that updates Quest when you finish a document.

Like adding a case status, updating filed statute dispositions or adding requirements for you.

There are now 65 FF Update Functions that will automatically update Quest for you!

Thank you, G&W!!

19

19

FF Update

- Changed updateEvent to allow ability to change the event type. (Best Practices Meeting)
eventType=event type (not required)
- Changed addFiledStatute to control a person having only one of a particular statute on a case (Coffee Adult)
onlyOnce=Y | N (y if the statute can only appear one time for the person)
- Added addCase (Coffee Adult)
command=addCase
caseType=type of case
court=assigned court (not required)
personVar=variable name using FF People
assignedRole=person role on case
referringAgency=agency that referred the person to the case
useDate=current | variable name (start date)
cause=cause number (not required)

Show me!

WAIT!! I can automatically
Add an Entire Case?

20

20

FF Update - continued

All part of adding a case

- Added addIncidentStatute (Coffee Adult)
 - command=addIncidentStatute
 - case=first | all | newest | oldest | ^varname using FF SelCaus
 - role=person role on case (blank for all roles)
 - assignTo=variable name using FF People (not required)
 - type=incident type code (can be blank)
 - statute=statute code
 - statuteCA=conspiracy/attempt code for statute (can be blank)
 - itemType=item type for statute (can be blank)
- Added addIdentityNote (Coffee Adult)
 - command=addIdentityNote
 - person=first | all
 - role=person role on case (blank for all roles)
 - assignTo=variable name using FF People (not required)
 - notes=variable with notes you want added

21

21

FF Update - continued

All part of adding a case

- Added medicalAlert (Coffee Adult)
 - command=medicalAlert
 - person=first | all
 - role=person role on case (blank for all roles)
 - assignTo=variable name using FF People (not required)
 - medicalCode=medical code
 - notes=variable with notes you want added/updated
- Changed updateCase to allow ability to expunge the case (Karlene)
 - expunged=Y | N (for 'Y'es, 'N'o - can be blank)
- Changed addRequirement to allow ability to specify a statute count/suffix, such as 1A, 1B, etc. (Coffee Adult)
 - count=statute count or ^varname with count and count suffix in it (not required)

Now you can Expunge with an FF Update!!

22

22

FF Update - continued

This is an
Indiana thing

- Changed personAttribute to now specify an attribute value when appropriate. Note: we'll discuss this later. (Laporte)

attributeValue=attribute value if defined by attribute type entry

- Added requirementPhase (Porter)

command=requirementPhase

case=first | all | newest | oldest | ^varname using FF SelCaus

role=person role on case (blank for all roles)

assignTo=variable name using FF People (not required)

type=requirement type

code=requirement code (if blank, only type has to match)

phase=Phase code

useDate=current | variable name (this is the phase start date - tries to find open one first though)

currentStatus=Current status to set on phase

endDate=variable pointing to the end date of the phase (not required)

notes=if specified, variable with notes you want added to the sanction/incentive

23

23

ethnicity=ethnicity

citizenship=citizenship

language=language

religion=religion

maritalStatus=maritalStatus

hairColor=hair color

eyeColor=eye color

height=height in inches

weight=weight

birthPlace=birth place

ssn=social security number

dob=variable pointing to the date of birth

dateOfDeath=variable pointing to the date of death

24

24

FF Update - continued

- Changed addDeadline and completeDeadline to allow notes to be specified (Porter)
note=text of note you want added
- Changed addDeadline so that useDate can be used to calculate the deadline date (Karlene)
useDate=current | variable name (deadline date - won't calc if this is specified unless calcFrom=y)
calcFrom=Y | N
- Changed addFiledStatute so that statute count can be specified (Coffee Adult)
count=count number (can be blank)

Before
if you wanted a deadline out 30 days, like "check IA status," the 30 days would begin with today. Now you can start it from a specific date AND add notes!!

25

25

FF Update - continued

- Added physicalID (Karlene)
command=physicalID
person=first | all
role=person role on case (blank for all roles)
assignTo=variable name using FF People (not required)
idType=physical/intangible identifier code
notes=variable with notes you want added/updated
- Added generateCause (Karlene)
NOTE: GenerateCause rule must be attached to CauseNumbers for apply request 'M'
command=generateCause
case=first | all | newest | oldest | ^varname using FF SelCaus
- Changed endCaseAssignment in order to specify 'current' for userID (Karlene)
userID=user id of person assigned (user ID | variable name using ff psnseq | current)

All part of adding a case

26

26

FF Update - continued

When you scan an assessment, it will add it with the date of the assessment.

- Changed assessment in order to specify a note to add (Karlene)

28

GAW060 – SendMessage2

Oh no! We just had a fight with injuries, I better let someone know!

- **Changed so works with Detention Incidents (Allen)**

Sends a Quest message to the desired parties about the passed object. The parties who receive the message are determined by the settings in the 'RULEPARMS' entry of the 'DEFAULTS' table.
Valid properties are:

SendMessage2.xxxx.yyyy.zzzz.n=<Quest userid>
this will send a message to the userid specified of what happened to the document.
xxxx is the lowercase tableid on which to send messages
yyyy is the lowercase role, if a caseassignments record, of the person assigned
yyyy is the lowercase location, if a facilitystays or staylocations record
yyyy is the lowercase case type, if a filedstatutes or causenumbers record
yyyy is the lowercase statute, if an incidentdstatute record
yyyy is the lowercase event type, if an events record
yyyy is the lowercase event attribute, if an eventattributes, caseattributes, stayattributes, or personattributes (personattribute) record
yyyy is the lowercase requirement type or type/code, if an requirements record
yyyy is the lowercase incident type if a detention incidents (detincidents) record ←

zzzz is 'g' for guilty or 'n' for not-guilty, if a filedstatutes record
For facilitystays, staylocations and incidentstatute, if no .yyyy entry matches, it will fall back to just the tableid
For statutes, if no .zzzz entry matches it will fall back to just .yyyy. If no .yyyy entry matches, it will fall back to just the tableid
n must start at 1 and increment by 1 for each entry specified.

29

29

GAW093 – EventToContact

- **Changed so that a contact could be added at the time the event is added (Porter)**

Creates a contact when an event is completed. Copies the event note to the contact note.
You also have the option as to whether you want to do this for court events.
It is intended to be used BEFORE UPDATE or 'A' (after all event names added) of the EVENTS database file.

The contact person and contact type are determined by the settings in the 'RULEPARMS' entry of the 'DEFAULTS' table.

Valid properties are:

EventToContact.includeCourt=<yes/no>
EventToContact.default.contactType=<contact type>
EventToContact.default.contactPerson=<contact person>
EventToContact.n=<event type>
EventToContact.n.contactType=<contact type>
EventToContact.n.contactPerson=<contact person>
where
event type is the type of event that is being updated.
contact type is the type of contact that occurred.
contact person is the person who was contacted.
n must start at 1 and increment by 1 for each entry specified.

You can make notes on the event detail screen and BOOM it is added as a contact note!

NOTE: The rule will first look for an event type that matches the passed event type to determine the contact type and contact person. If it can't find one, it will use the default contact type and default contact person.

30

30

GAW164 – GenerateFileNbr

- New rule to generate a file number without a case being added (Madison, IN)

Generates a file number at the desired time.

This rule should usually be implemented AFTER ADD or AFTER UPDATE of something.

This only works with a GAWDBObject that has a getIdentity() method being the sendingObject.

Only people with a case automatically get a file number. If you hold a child in detention for another agency you may not add a case, but you may want the child to have a file number.

31

31

GAW165 – ProtectAlias

- New rule to protect specific alias types (Allen)

This is meant to protect specific alias type from people who would otherwise be authorized to it.

To prevent add/update of an alias type, it should be used BEFORE_INSERT and BEFORE_UPDATE of the Aliases database object.

To prevent delete of an alias type, it should be used BEFORE_DELETE of the Aliases database object.

The alias types to be protected are determined by the settings in the 'RULEPARMS' entry of the 'DEFAULTS' table.

Valid properties are:

ProtectAlias.type.n=<alias type>

ProtectAlias.type.n.authorized.m=<group id>

where

<alias type> is the alias type to be protected.

<group id> is the user group that is authorized.

n must start at 1 and increment by 1 for each entry specified.

m must start at 1 and increment by 1 for each entry specified - it starts over for each 'n'.

This has to do with the new Dashboard button you see when you go to Supervision Dashboard

32

32

GAW166 – AddAttributeOnEvent

- New rule to automatically add event attributes (Baltimore)

Adds an event attribute whenever an event of a specified type is added.
This should be called AFTER INSERT of a Events database object.
The attributes to be added are determined by the settings in the 'RULEPARMS' entry of the 'DEFAULTS' table.

Valid properties are:

AddAttributeOnEvent.type.n=<event attribute>

where

type is the event type (lowercase).

n must start at 1 and increment by 1 for each entry specified.

They are using this to automatically add that it was a virtual hearing.

Identity Detail

- Added checkbox to protect name fields on existing identities – need to uncheck to edit (St Joe – wish list)

The screenshot shows a form for 'Identity Detail'. At the top, there is a 'Name' section with a checkbox labeled 'Protect name' which is checked. A yellow arrow points to this checkbox. Below the checkbox are input fields for 'First' (Carla), 'Middle', 'Last/Business:*' (Smith), and 'Generation:' (a dropdown menu with '-- Select --'). Below these are fields for 'File number:' (16394), 'Emancipated:' (radio buttons for Yes and No, with No selected), and 'Status:' (a dropdown menu with '-- Select --'). Below the 'Name' section is an 'Identifying information' section with fields for 'Race:', 'Sex:', and 'Gender/Pronoun:'.

No more names being typed over because they think they're on Name Search!!

Document Query

- Lists all completed documents needing file stamp, approval, or notice - new common query(Karlene)
 - [Petitions filed for a date range](#)
 - [Documents needing file stamp, approval, or notice](#)

Documents Needing File Stamp, Approval, Or Notice				
Information to show: <input checked="" type="radio"/> Need file stamp <input type="radio"/> Pending approval <input type="radio"/> Pending notices				
<input type="button" value="Submit"/> <input type="button" value="Select results for copy/paste"/>				
Document Date	Document	Approval Status	File Stamped	Assigned To
7/3/2008 10:17:07 AM	Motion to Withdraw Attorney Appearance			Peter Nemeth
8/26/2008 12:36:29 PM	PROGRESS REPORT			Terrence King
9/11/2008 5:15:56 PM	PROGRESS REPORT PERMANENCY			Lisa Williams
9/19/2008 1:56:51 PM	PROGRESS REPORT			Terrence King

Really helpful for data cleanup!!!
If you file stamp, electronically approve and/or send notices you need to check this out!

89

Document Reassignment

- Uses defaults table entry DocAssignments2 to determine who to default/place in the 'User ID' field when entering the screen (Lake)

Code: DOCASSIGNMENTS2

Short description:*

Long description:*

Active:* Yes No

Notes:

```
# Used to default the identity of the next person who will be responsible for a document.
# NOTE: THIS IS A PROPERTIES FILE. EACH ENTRY MUST BE CAPITALIZED AND ON ITS OWN LINE.
# CURRENTUSERID=NEWUSERID
MAGTAL=SUSPUD
MAGVAN=HELGAL
REFHAR=RUTKRA
MAGGAR=JACMAT
```

This was because the Judicial Officers reassign filings to their reporters and now it defaults to their reporter's name!

90

90

History Screen Defaults

- Ability to not show incidents on the screen (TN)

Code: HISTORY

Short description:* History

Long description:* Customize the list history screen

Active:* Yes No

Notes:

```
# Requirement types or type/codes to include under 'current locations'  
# locType.n=TYPE or TYPE/CODE  
  
# skip incidents on the screen (y/n)  
skipIncidents=n
```

91

91

Incident Type Table

- Ability to set change the color of each incident type (Montgomery)

Code: ARR

Short description:* Arrest

Long description:* Arrest

Statutes (Y/N): Y

Incident ID R/W: W

Case# req(Y/N): Y

Color: red

Active:* Yes No

Mobile Crisis Referral

Statutes (Y/N): N

Case# req(Y/N): N

Color: red

This is a great way to make an incident stand out.

92

92

List Contacts

- New Defaults entry ContactDays to control how many days to default to when no dates are entered (Monroe)

Code: CONTACTDAYS

Short description:*

Long description:*

Active:* Yes No

Notes:

Specifies the default number of days that should be searched on the list contacts screen when a from/to date not entered.

Wish your list of contacts notes always showed more than just the last 30 days?
No problem!

Person Attributes

- Added attribute values which are controlled by the attribute type table (Laporte)

Code: SG06

Short description:*

Long description:*

Requirement Phases

- Ability to close a requirement phase even if it has open items (Lake)

```
This is documentation for what options can be added in the options f
requirement phase code.
#####
# Use these settings to control the date range
# of the contacts displayed in printer friendly
# mode when this is the active phase.
# Hearings are check first looking at the
# previous 30 days for a hearing
# of type <contactHearing>. If found, this
# is beginning of the date range. If not found
# then <defaultContactDays> is used to calculate
# the beginning of the date range. If
# <defaultContactDays> is not specified, then
# 14 days is used as the default.
# Format:
# defaultContactDays=<n> where n is the number
# previous days to display.
# contactHearing.n=<hearing type> where n is
# a consecutive sequential number starting
# at 1 and <hearing type> is a valid court
# hearing type.
#####
defaultContactDays=14
contactHearing.1=REV
contactHearing.2=DIS

# can the phase be completed while phase items are still undone
# this way you can skip completing items that may not apply
completeWithOpenItems=y/n
```

This is for problem solving courts. Even if they haven't completed every step, they can still move to the next phase
