

Replace ActiveX Signatures with image tags (Y?N)

What it does:

Allows you to use images rather than the Topaz ActiveX control to display signatures.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: `REPLACESIGTAGS`

Short description:*

Long description:*

Active:* Yes No

Notes:

For documents, we have the option to display signatures as images, rather than using the ActiveX control that's part of Topaz. If you want to display images instead, set the short description to 'y'. Otherwise, set the short description to 'n'.
