Show petition number requirement statutes?

What it does:

Allows you to append the petition number to the statute description. When outputting the counts tied to a requirement, this will append the petition number if the short description is 'Yes'. So, to start with, it would only show on requirements that have counts associated, like sentencing.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: REQPETITIONNBR
Short description:* *yes
Long description:* Show petition number requirement statutes?
Active:* ● Yes ○ No
Notes:
Used in conjunction with ReqStatutes. If ReqStatutes is '*yes', should the petition number be appended to the statute description? Should be *yes if the petition number should be appended. If this is anything but *yes, the petition number will not be appended.
