

# Requirement phase code default values

## What it does:

---

This is documentation for what options can be added in the notes of a requirement phase code.

## Adding the table entry

---

Menu | Tables | Generic Validation Tables | Defaults

---

Code: REQPHASES  
Short description:\* ReqPhases  
Long description:\* Requirement phase code default values  
Active:\*  Yes  No

This is documentation for what options can be added in the options field of a requirement phase code.

#####

# Use these settings to control the date range of the contacts displayed in printer friendly  
# mode when this is the active phase.

# Hearings are check first looking at the previous 30 days for a hearing of type <contactHearing>.  
# If found, this is begining of the date range. If not found then <defaultContactDays> is used to calculate  
# the begining of the date range.  
# If <defaultContactDays> is not specified, then 14 days is used as the default.

# Format:

# defaultContactDays=<n> where n is the number previous days to display.  
# contactHearing.n=<hearing type> where n is  
# a consequtive sequential number starting  
# at 1 and <hearing type> is a valid court  
# hearing type.

#####

defaultContactDays=14  
contactHearing.1=REV  
contactHearing.2=DIS
