Requirement status

What it does:

Allows you to define different status options for your requirements. The options can mean the requirement is closed or open, successful or not. Can be for specific requirement types/codes and allows you to specify what the phase status and treatment status should initially be set to if this requirement status is used.

Adding the table entry

Menu | Tables | Generic Validation Tables |

- **Code** – Choose a code. It can be 1-4 characters.
- **Short description** – The short description can be up to 15 characters
- **Long description** – The long description is what the users see, it can be up to 50 characters long.

Click the **Update** button to save your work.
