

RECALCULATE CASE ASSIGNMENTS

Report Description:

This report recalculates the case assignments for those people assigned to a case. You can cause it to recalculate all case assignments or only for a specific person type.

Running the Report:

You don't need to manually run this report, it will run by itself. But if you wanted to recalculate the case assignments before the scheduled time you can.

Recalculate Case Assignments

Enter report criteria and press "Submit"

This report does not require any additional input. Press "Submit" to submit the report for execution.

The Report:

There is no report associated with this; it simply recalculates. This report is normally set to "inactive" status, but once it runs, it will continue to run behind the scene at the set intervals.

List Case Loads

Either enter criteria and press Submit, or make a selection from the list

Agency: Division: Unit:

Unit	Personnel	Assigned People	Assigned Cases	Average People	Average Cases
Administrative	0	0	0	0	0
Intake	2	64	64	32	32
Intensive Sex Offender Program	1	26	26	26	26
Residential Placement	2	22	23	11	11.5
Supervision	3	51	52	17	17.333
Total	8	163	165	20.375	20.625

Where the data comes from:

The report looks at the names assigned to the case and calculates how many people and cases each name assigned has.

This is used on the Menu | Supervision | Case Loads screen as well as in many reports.

You can limit the calculation to only specific types of people by specifying the “[personType](#)” report setting . You can specify how often this report runs by specifying the “[interval](#)” report setting.

By setting the “notifyLevel” to 10, you don't get a message every time the program runs and completes successfully.

Report Settings:

-- Required settings --

class=equest.app.reports.RecalcAssign

jobQ=batch

limit to people of the following types

personType.n=<PERSON TYPE>

number of minutes between running program

interval=60
