Current location associated with requirements

Report Description:

This report will provide a list of all the people with a specific requirement and the address of that person. For example, children in foster care have a placement requirement. You can add the specific address and contact information of the foster parents in that requirement location. You can then pull this report and it will give you the exact address of every child in foster care. This would be a great report to have in the event of a disaster.

Running the Report:
