

# Requirement statistical report

## Report Description:

---

This report will provide information on specific requirements that were opened or closed during a time period. It will break down the report by race, sex, and age of the participants. It will report schools attended, drug screen, requirement status, and recidivism numbers.

## Running the Report:

---

Enter the beginning and ending dates. Select the requirement you wish to view.

You can select a specific provider and only those requirements with that provider will be listed.

You can choose the different sections to include in the report.

You can limit the report to only display requirements with a specific status and you can limit it to only specific case types.

### Requirement Statistical Report

Enter report criteria and press "Submit"

From date:  

To date:  

NOTE: All persons who participated in the requirement during the date range specified above will be included in the statistics.

Requirement type/code to report:

NOTE: You may select a Requirement type and code OR just the Requirement type. If you select only a Requirement type, then statistics will be generated for each requirement code of that type. Although selecting a Requirement type is not required to 'submit' the report, if no Requirement type is selected the report will be empty.

Provider (only applies if requirement entered):

Report sections to include:

Schools:  Yes  No

Positive substance reports:  Yes  No

Negative substance reports:  Yes  No

Requirement dispositions:  Yes  No

Recidivism:  Yes  No

Recidivism by charge class:  Yes  No

Limit to those with status:

Limit to those with case type:

The Report:

School begin	A [REDACTED] a	66661/	C	M	12/31/2002	9/26/2018	PHS	9/6/2018	
School begin	A [REDACTED] a	66661/	C	M	12/31/2002	7/9/2018			

## Where the data comes from:

---

This report will search for the requirement requested proving the information broken down by race, age and sex.

It will look at the schools attended at the start and at the end of the requirement and report both.

It will report the drug screen types specific in the report settings as “[substance.report.type](#)” for these participants while this requirement was open, within 6 months, 1 year and over 1 year of this requirement closing.

It will report the requirement status or “disposition” of the requirement.

It will search for recidivism checking to see if a new case was added while this requirement was open, within 6 months, 1 year and over 1 year of this requirement closing. It will report the severity of the most serious offense of the new case. You can specify which case types to exclude by defining the “[skipCaseType](#)” report setting.

If your report is programmed for details=yes, you will get all the details of the names that created these statistics.

## Report Settings:

---

```
# -- Required settings --
class=equest.app.reports.RequirementStatistical

# Case types to skip when calculating recidivism
skipCaseType.1=JC
skipCaseType.2=JP
skipCaseType.3=DR
skipCaseType.4=JT
skipCaseType.5=JS
skipCaseType.6=JM

details=no

# This report can be initiated online or as a scheduled job.
# To specify the requirements to include in the report for a scheduled job,
# specify requirementType and/or requirementCodes. Multiple entries are
# allowed for either field. To specify all codes of a specific type, use
# requirementType.n=<requirement type>.
# To specify an individual requirement code use
# requirementCodes.n=<requirement type/requirement code>.
# Samples
#requirementType.1=PROB
#requirementCodes.1=COMM/DOC

# Specify the substance report types to include in the substance abuse section:
# substance.report.type.n=<reportType>
```

substance.report.type.1=URIN

# Specify the sections of the report to produce as:

# section.schools=<yes/no>

# section.subReportNeg=<yes/no>

# section.subReportPos=<yes/no>

# section.dispositions=<yes/no>

# section.ricidivisim=<yes/no>

# section.chargeClass=<yes/no>

section.schools=yes

section.subReportNeg=yes

section.subReportPos=yes

section.dispositions=yes

section.ricidivisim=yes

section.chargeClass=yes
