

Risk assessment statistics

Report Description:

This report will look at the selected detention assessments for the time period and provide statistics about them. It reports the overall score, the assessment level which is the detention decision: detain, release, release with conditions, and override reasons. It presents the data comparing the different detention decisions by sex, race, age and offense reason.

Running the Report:

Enter the beginning and ending date. This will look at assessments with a date during this time period.

Select the assessment type.

You can override the start for medium and high points or accept the default numbers.

If you say yes to screened info only you will get ????

If you say yes to overrides only you will only get those assessments that have an assessment level of override.

You can narrow it by race, sex, and age.

You can include details if desired and include the reason section if desired.

Where the data comes from:

The report searches for the selected assessments with an assessment date/time during the time period. If found, it will provide information on the assessment, including the date, overall score, assessment level and override reason (if you chose to include reason section when you ran the report). It will provide demographic information on the person such as sex, race, and age. It will also look for the last incident on or before the date of the assessment and report the lowest incident statute sort level in the reason column. (1 being the worst severe offense and 22 being the least severe offense)

It will then report this information by the assessment level, and whether there was an override reason.

This is sorted by sex, race, and age.

Assessment date/time: 9/10/2018 10:12:33 AM
 Assessment type: Detention RAI
