

RULES

[General Information](#)

Person

GAW085	Change Person Status	Changes a person's status when a 'Date Of Death' is entered.
GAW094	Tennessee Secure Person	Provides specialized security about who can see specific people in Quest based upon hard coded rules.
GAW050	Indiana Secure Person	Provides specialized security about who can see specific people in Quest based upon hard coded rules.
GAW133	Secure Person Attribute	This rule is designed to limit access to regular, special, and/or at risk person attributes. By default, everyone authorized to view person attributes can view these. With this rule, you can define which group(s) should NOT be authorized.
GAW126	Change School Status	Changes the person's current school status when all cases for the person have been closed.
GAW128	Copy Agency Contact Information	<p>Copies the employer agency address/contact numbers to a person.</p> <p><u>WHY WOULD I USE THIS?</u> If you routinely add agency employees, for example DCS caseworkers, this rule would automatically add their work address and work phone number.</p>
GAW143	Send Message for Address	Sends a message to specific case assignments if an address is changed for a person.
GAW156	Protect Address	<p>This is meant to protect specific address type from people who would otherwise be authorized to it.</p> <p><u>WHY WOULD I USE THIS?</u> This is a great way to keep groups of people from changing specific addresses. If you have a Notice Address for example, this is the address provided by the parties as to where they can be served. Then DCS or IV-D can change the home address to a new address for serving summons, but the Clerk will continue to send notice of court orders to the Notice Address until provided a new address by the parties. You can protect the Notice Address address type so DCS and IV-D can't change it.</p>
GAW157	Protect Phone	<p>This is meant to protect specific phone number type from people who would otherwise be authorized to it.</p> <p><u>WHY WOULD I USE THIS?</u> This is a great way to limit the number of people who can add or change a specific contact number. For example, a Notice Email</p>

		that is provided by attorneys and pro se litigants who have agreed to receive copies of court orders by email.
GAW146	Secure Medical Treatment	This is meant to protect medical treatments from being seen by people who would otherwise be authorized to them.
GAW074	Allen End Home Address	This rule is designed for Allen County to automatically end all open home addresses when a protected address is added.

Cases

GAW072	Update State Decision	This is meant to act as a trigger to update the state's decision and decision date when a document is file stamped.
GAW076	Default Home Court	Defaults the home court when a case is added. It will check to see if the casename has previously been assigned to a single court. If so, it will assign the case to that court, regardless of what the user may have entered.

GAW127	Secure Case	Secures specific cases. 1) Person must be directly assigned to the case or the supervisor of a person directly assigned.
GAW057	Secure Case	Nobody from a specified agency can see a case from another user from that agency. <u>WHY WOULD I USE THIS?</u> If you have a probation officer with a case in the system, this would stop everyone from that same agency from seeing that probation officer's case.
GAW129	Secure by Open Case	Secures a record by checking for open case. Most groups only have access to the record if the person has an OPEN case of a type the user is authorized to. If a person does not have an open case, certain areas of their record can be hidden, such as substance reports, contact notes, etc.
GAW155	Tennessee Secure Case	Provides specialized security based upon hard coded rules. In summary, the rules are: 1) A person can only see a case if the home court matches the person's employer agency. <u>WHY WOULD I USE THIS?</u> If you have multiple agencies using the same Quest jurisdiction.
GAW138	Validate Case	Performs logical validations on a case. <u>WHY WOULD I USE THIS?</u> Right now, this allows you to say in which case types Filed Statutes Must Exist. I can see opportunities for future use.

GAW140	Indiana Update Cover Sheet	<p>Automatically formats and updates the oldest cover sheet entry for a case. The entry is added if it doesn't already exist.</p> <p><u>WHY WOULD I USE THIS?</u> The cover sheet is a great way to see specific information on companion cases.</p>
------------------------	----------------------------	---

Case Assignments

GAW064	Add User to case on requirement	<p>Assigns users to a case whenever a requirement of a specified type or type/code are added.</p> <p><u>WHY WOULD I USE THIS?</u> This is a great way to add a user to the case when a specific requirement, such as community service is added, if you have a specific person who monitors the community service activity.</p>
GAW069	Add user to case on status	<p>Assigns users to a case whenever a case status of a specified type is added.</p> <p><u>WHY WOULD I USE THIS?</u> If you want to add a specific person to a case assignment every time a new case is open, this allows you to do that, or if a case status of "collections" is added, you could add your collections person to the names assigned to the case for example.</p>
GAW089	End Case Assignments	<p>Ends all open case assignments of the specified type when a new assignment of the same role is added.</p> <p><u>WHY WOULD I USE THIS?</u> If you want to prevent duplicate roles.</p>
GAW100	No Duplicate Roles	<p>Prevents 2 or more people from being assigned to the same case at the same time with a specified role.</p> <p><u>WHY WOULD I USE THIS?</u> If you want to prevent duplicate roles.</p>
GAW113	Add User to case on incident	<p>Adds the current Incident Officer as a case assignment.</p> <p><u>WHY WOULD I USE THIS?</u> When adding the officer to the incident detail screen, that person can also be automatically assigned to the case in whatever role you wish, petitioner, witness, arresting officer, etc.</p>
GAW141	Stay to Case Assign	<p>This is meant to act as a trigger to automatically add/update the corresponding case assignment to the database whenever a stay reason starts and/or ends.</p>
GAW015	Send Message	<p>Sends a Quest message to all active case assignments (who are Quest users) tied to the record in question letting them know about the action.</p>

		<p><u>WHY WOULD I USE THIS?</u></p> <p>It is a way to ensure all Quest users who are assigned to the case are aware of different things being added in the case, such as case assignments, case names, deadlines, facility stays, and incidents.</p>
GAW060	Send Message 2	Sends a Quest message to the desired parties about the passed object, such as a new case assignments, facility stay or stay locations, filed statutes or cause numbers, incident statutes, event types, or event attributes.

Case Status

GAW090	Update Case Status	<p>This is meant to act as a trigger to update the case status when a document is file stamped (by default) or other time, if specified.</p> <p><u>WHY WOULD I USE THIS?</u></p> <p>Sometimes we use an FF Update to add a case status, such as a DCS Petition Alleging Child in Need of Services, we want it to add a case status of "Petition Filed." However, this adds the case status when the document is FINISHED. If a petition is finished at 5:00 on a Friday night, it may not be file stamped until Monday morning, so a case status of Petition Filed on Friday would not be as correct as a case status of Petition Filed on Monday morning. This rule will allow you to specify which templates should add a case status upon File Stamp, completion, or approval.</p>
------------------------	--------------------	--

Deadlines

GAW136	Send Email for Deadlines	<p>Sends a message to all active case assignments from the same agency as the agency assigned to the deadline letting them know about the deadline.</p> <p><u>WHY WOULD I USE THIS?</u></p> <p>It is a way to notify the agency responsible for the deadline that a deadline has been added, updated, or deleted on their case.</p>
GAW047	Indiana PD Visit Deadline	For Marion County Indiana, this rule creates a deadline for the PD to visit someone in secure detention when the PD is appointed to a case.
GAW053	Indiana Transport Deadline	For Marion County Indiana, creates a deadline for the Court to issue a return order whenever a transportation order is generated.

Warrants

GAW021	Warrant Notify	<p>This rule is will send eQuest messages to specified Identities when a Warrant is added/updated. The purpose is to notify certain parties like the Sheriff who must know when Warrants are issue, served, recalled, etc. Messages are intended to be sent when a new Warrant record is added or when the warrant status is changed.</p> <p><u>WHY WOULD I USE THIS?</u> This is a great way to keep people informed of warrant changes.</p>
------------------------	----------------	--

Incidents

GAW023	Allen Incident Docket Entry	This rule ensures there is always a 'WIR' manual docket entry written for any incident which is added or updated that is tied to a Case.
GAW029	Howard Requirement to Incident	This is meant to act as a trigger to automatically add the corresponding incident to the database whenever a probation requirement starts and ends.
GAW030	Howard Stay To Incident	This is meant to act as a trigger to automatically add the corresponding incident to the database whenever a stay starts and ends.
GAW038	Tippecanoe Requirement to Incident	This is meant to act as a trigger to automatically add the corresponding incident to the database whenever a requirement starts and ends.
GAW039	Tippecanoe Stay To Incident	This is meant to act as a trigger to automatically add the corresponding incident to the database whenever a stay starts and ends.

Filed Statutes

GAW026	Allen Update Filed Date	This is meant to act as a trigger to update the filed date of the latest filed statutes with the date of the current case status record. It will only do it when case status is changed to petition filed or modification filed.
--------	-------------------------	--

Events

GAW078	Secure User Event	This is meant to limit access to changing/deleting a non-court event to the person who created it.
GAW082	Send Email for Events	<p>This will send an email notifying all case assignments tied to the event of the event, along with a calendar invite attachment.</p> <p>For somebody to receive an email, we must have their email address within Quest.</p> <p>It is also possible to specify email addresses that should get notice for specific event types or events from a specific court.</p>
GAW116	Send Message for Events	<p>This will send a Quest message notifying all case assignments tied to the event of the event.</p> <p><u>WHY WOULD I USE THIS?</u></p> <p>This is a great way to notify probation officers if someone is scheduled to appear for a drug test for example, and an event disposition is added as “failed to appear.” A quest message will be sent to all names assigned to the case.</p>
GAW093	Event to Contact	<p>Creates a contact when an event is completed. Copies the event note to the contact note.</p> <p><u>WHY WOULD I USE THIS?</u></p> <p>Probation appointments for example, if you pull up your calendar and make notes on each event as they happen it is an easy way to quickly add a contact note.</p>
GAW114	Event Appearance Set Document	Overrides the document to create for the event appearance based on the configuration settings for this rule.
GAW117	Event to Substance Report	<p>Creates a substance report when an event is completed 'successfully'. You also have the option as to whether you want to do this for court events.</p> <p><u>WHY WOULD I USE THIS?</u></p> <p>This is useful in drug courts when you’ve scheduled the person to come in for testing. You can automatically add a substance report just be disposing of the event.</p>
GAW123	Validate First Case Attribute	Validates that, if an event is flagged with a 'first case of the day' attribute, it is the only event for that court with the attribute and, none of the case assignments are already associated with another 'first case' in another court that day.
GAW125	Copy Case Notes	This is meant to automatically copy notes from one case to another. It will only do it for notes added/updated within an event.

GAW135	Secure Event Overload	<p>This is a security rule designed to limit a user or group to specific court(s) if they are authorized to overload hearings.</p> <p><u>WHY WOULD I USE THIS?</u> This is a great way to limit departments, such as IV-D or DCS from scheduling more than a specific number of cases for a court. When they have reached the specific number, they can't add any more hearings.</p>
GAW151	Update Event for Requirements	<p>Updates an existing event on the same day with a completion code and note of why completed for all people tied to a requirement related object.</p>

Requirements

GAW058	Send Email on Requirement	<p>Sends an email to the desired parties about the passed Requirements / RequirementCases objects.</p> <p><u>WHY WOULD I USE THIS?</u> Allows you to notify someone by email when a requirement is added, such as a referral to a treatment facility or a commitment to DOC or DCS.</p>
GAW108	Send Message for Requirements	<p>Sends a Quest message to all active case assignments (who are Quest users) for the names tied to the underlying requirement letting them know about this particular item. It also allows you to specify additional people to receive notification.</p> <p><u>WHY WOULD I USE THIS?</u> This is very useful in notifying someone of a payment on a requirement, such as a bond payment where the clerk needs to process it.</p>
GAW070	Add Attribute on Requirement	<p>Assigns a person attribute and/or requirement attribute whenever a requirement of a specified type or type/code is added.</p> <p><u>WHY WOULD I USE THIS?</u> For statistical purposes every time you add a specific requirement you could also automatically add a requirement attribute. Such as when you add community corrections/drug court, a requirement attribute of problem solving court could be added. So you could pull statistics how many people were involved in problem solving court, if you had several requirements of this type or you could add a person attribute of drug court participant or something.</p>
GAW079	Ensure Requirement Exists	<p>This is meant to limit insertion of data into a case until a specific requirement type/code has been added for that case.</p> <p><u>WHY WOULD I USE THIS?</u></p>

		This is helpful if you have a specific requirement that must be added, such as a specific program you are running and you want to make sure the requirement has been added.
GAW084	Stop Requirement Overlap	Prevents 2 requirements from overlapping each other (except on start/end date). <u>WHY WOULD I USE THIS?</u> Maybe you want to prevent two home detention fees from running at the same time.
GAW137	Add Scheduled End to Requirement	This is meant to automatically place a scheduled end date on all defined 'auto' add requirements that are still open when the primary requirement is ended. The scheduled end date will match the status date of the primary requirement. The 'auto' add requirements are defined in the settings for the primary requirement. <u>WHY WOULD I USE THIS?</u> If on your home detention for example, you have it configured to add a fee requirement when the home detention requirement is added, then when the home detention requirement ends, this rule will cause a scheduled end date to be added to the fee requirement, thereby stopping the assessing of more fees.
GAW139	Track SI Inventory	This rule keeps the sanctions/incentives inventory field up to date (in the sanctions/incentives generic validation table). <u>WHY WOULD I USE THIS?</u> If you have a requirement where you are using sanctions and incentives, such as drug court, and you have 10 movie cards to give out as incentives, when you give 1 away, this will keep track of the fact that you only have 9 movie cards left.
GAW148	Add Req Attribute By User	Adds a requirement attribute whenever one of the following conditions is met: 1) A specific user is added to the case if the case already has the specific requirement 2) A specific requirement is added to the case if the case already has a specific user

Financials

GAW004	Generate Transaction Nbr	This is the default generator for financial transaction numbers. <u>WHY WOULD I USE THIS?</u> If there are multiple departments taking payments and you want the transaction numbers on receipts to be different. For
------------------------	--------------------------	--

		example: Clerk's numbers start with a C and Probation starts with a P.
GAW102	Update Requirement on Paid	<p>Updates the associated Requirement when a transaction results in the requirement being fully paid or waived.</p> <p><u>WHY WOULD I USE THIS?</u> This is a wonderful way to ensure the requirement status gets updated when a fee is paid or waived without the user having to remember to do it.</p>
GAW103	Transaction Edits	<p>This allows the user to configure rules for the financial transactions, such as allow future dates, allow back dates, allow negative amounts , payment method required, payor required, etc.</p> <p><u>WHY WOULD I USE THIS?</u> It makes certain fields on the take a payment window mandatory. Such as you must have a payment method and a payee selected or you will get an error message. If you don't allow back dates the user can't accidentally date the payment 1/1/18 instead of today.</p>
GAW106	Credit Card Fee	This rule is designed to recalculate the transaction fees specifically for credit card transactions.
GAW095	Notify Collection on Payment	This rule will send an email to a collections agency when payment transactions are entered, notifying them of payments received.
GAW098	Indiana Assess 25 of Open	Automatically assesses a given percentage (defaults to 25%) of all outstanding balances for a person when the specified requirement type/code is added.
GAW120	Substance Report to Transaction	<p>Creates a transaction to an existing open requirement every time a substance report is added.</p> <p><u>WHY WOULD I USE THIS?</u> When a specific type of substance report is added, it will automatically add the drug test fee.</p>
GAW147	Update Payment Plan	This rule keeps the payment plan requirement in sync with payments made. It matches on the person making the payment matching the default payee of the payment plan requirement on a case being paid.
GAW040	Indiana Add Estate Court Costs	This is meant to act as a trigger to automatically add court costs to ESTATE cases.
GAW022	Allen Credit Card Fee	This rule is designed to recalculate the transaction fees specifically for credit card transactions. It is very hard coded and will only work for specific requirement transaction types that already include certain accounts.

Documents

GAW011	Protect Document	<p>This is meant to protect documents from being updated or deleted once notice has been sent (printed).</p> <p><u>WHY WOULD I USE THIS?</u> Once notice has been sent to the parties, you wouldn't want a Reporter to be able to hit Edit Text and change a document.</p>
GAW083	Protect Document2	<p>This is meant to protect a document from being updated once it has been completed.</p> <p><u>WHY WOULD I USE THIS?</u> Certain documents will send information to someone upon completion or may update certain areas in Quest. You may want to block these types of documents from being changed after finished.</p>
GAW071	Secure Document	<p>This is meant to limit access to a document to either the person who created it or the person assigned to it.</p>
GAW150	Secure Document 2	<p>This rule is designed to limit access to docket codes that a user may otherwise be authorized to view. With this rule, you can define which group(s) should NOT be authorized.</p> <p><u>WHY WOULD I USE THIS?</u> You may have invoices submitted by appointed attorneys or GALs that you don't want the other names assigned to the case to see, so if you scan the invoice as a docket entry, then add that docket code to this rule, certain security groups can't see it.</p>
GAW014	Send Email for Documents	<p>Sends an email or fax if possible to all active case assignments for the names tied to a document letting them know about the document. It also updates the fact that notice was sent to these people.</p> <p>It is possible to skip sending emails for documents that need approval or need file stamp until that event happens. If you do this, make sure to add the rule to those events on the document so people get notice when that happens.</p> <p><u>WHY WOULD I USE THIS?</u> It is a way to ensure everyone who is assigned to the case but is not a Quest user is aware of the documents being entered in the case. If you are using the certificate of service and print pending notices I would not turn this rule on.</p>
GAW065	Send Email for Documents 2	<p>Sends an email to the desired parties letting them know about the document. It also updates the fact that notice was sent to these people.</p>

		<p>WHY WOULD I USE THIS?</p> <p>This is a great way to notify people who are not assigned to the case of a document, such as the sheriff if the document is a warrant.</p>
GAW016	Send Message for Documents	<p>Sends a Quest message to all active case assignments (who are Quest users) for the names tied to a document letting them know about the document. It also updates the fact that notice was sent to these people.</p> <p>While it could be called for any request, it makes the most sense to call it with either 'a' (upon completion) and/or 'A' (when the document is approved/rejected).</p> <p>It is possible to skip sending messages for documents that need approval or need file stamp until that event happens.</p> <p>WHY WOULD I USE THIS?</p> <p>It is a wonderful way to ensure all Quest users who are assigned to the case are aware of the document being entered in the case but that they don't get the documents until they are approved, or file stamped.</p> <p><i>I would recommend using the "skip until approval=y" and "skip until file stamp=y" option so that notice is not sent to anyone until that happens.</i></p>
GAW059	Send Message for Documents 2	<p>Sends a Quest message to the desired parties about the passed Documents object. If a DocumentNames object is passed, the message refers to the underlying Documents object which must be a manual docket entry. It also updates the fact that notice was sent to these people.</p> <p>WHY WOULD I USE THIS?</p> <p>If you wanted to send a copy of a file stamped document or an approved order to a Quest user who is not assigned to the case, such as the Prosecutor or the Clerk.</p>
GAW017	Send Message On File Stamp	<p>Sends a Quest message to the desired parties indicating a document has been file stamped. Can be sent to all case assignments or to a specific quest user.</p> <p>WHY WOULD I USE THIS?</p> <p>You could potentially use this to notify the Clerk of all the documents that have been file stamped that day. Once documents are file stamped they are removed from the list to be file stamped. If you used this rule to send all file stamped documents to a generic clerk user, they would quickly print all the documents that were file stamped that day.</p> <p><i>But other than that, I would use GAW016.</i></p>

GAW061	Indiana Send School Notice	<p>It sends a generic email to the current school for each person with an open case attached to the document that has a guilty felony charge. It also sends a regular Quest message to every user directly authorized to the person's current school assignment.</p> <p>WHY WOULD I USE THIS? Because in Indiana you are required to notify the schools of adjudications. IC 35-50-8 & IC 35-50-8-1</p>
GAW063	Auto Approve Document	It will automatically approve the document.
GAW081	Add Contact for Documents	<p>This will add a contact note for a document.</p> <p>WHY WOULD I USE THIS? If you created a Violation Petition for example, you may want to add a contact note that says "Violation Petition Filed."</p>
GAW144	Auto Assign Document	Automatically assign a document to the last user of the specified role attached to a case associated with the document.

Supervision

Assessments

GAW092	Protect Assessment	This is meant to protect an assessment or assessment detail from being viewed by a group otherwise authorized.
------------------------	--------------------	--

Contacts

GAW107	Secure Contact	This rule is designed to limit access to contacts of specified types. If a contact is being secured, in addition to the regular authority to access it, the user must be in the same agency as the person who created the contact.
GAW109	Add Contact for Requirements	This will add a contact note for a requirement related object.
GAW112	Document Note to Contact	Creates a contact when a document note is completed by a particular person. Copies the document note to the contact note.
GAW118	Contact to Substance Report	<p>Creates a substance report when a contact is added.</p> <p>WHY WOULD I USE THIS? If you add a contact that you gave a field alcohol test for example, when that contact type is added, it will automatically add a substance report for that date and time.</p>
GAW121	Case Plan to Contact	This is meant to create (or update) a contact note when a case plan item changes.
GAW124	Protect Contact	This is meant to protect specific contact notes from being seen by people who would otherwise be authorized to it.

Detention

GAW087	Require Case on Stay Reason	Validates that a case is tied to the Stay Reason record.
GAW099	Stay to Require	This is meant to act as a trigger to automatically add/update the corresponding requirement to the database whenever a stay reason starts and/or ends. <u>WHY WOULD I USE THIS?</u> If you are tracking your facility stays also as requirements this is a great way to automate it.
GAW101	Send Email for Detention	Sends an email to the desired parties about detention counts exceeding a desired threshold.
GAW119	Send Email for New Detention	Sends an email to the desired parties about a new person being brought into detention.

GAW142	Add Assignment as Visitor	Adds an assigned person as an approved visitor whenever a case assignment is added and there's an open stay or whenever a stay is added and there's an open assignment. Whenever either the stay or assignment ends, the person is removed from the visitor list (unless the stay is still open and the person is assigned to another case).
GAW024	Allen Protect Log Book	This is meant to protect the shift leaders log book from being seen by people who would otherwise be authorized to it. <u>WHY WOULD I USE THIS?</u> This is helpful if someone needs a log book that they don't want others who have security to view log books to see. Such as if shift leaders need to log information about staff, but don't want staff to be able to see it.
GAW025	Allen Stay To Incident	This is meant to act as a trigger to automatically add the corresponding incident to the database whenever a stay starts and ends.

Time Keeping

GAW019	Time Keeping	Access the old G&W time keeping system to update the in/out information for a person. This only works for Lake County when the locator screen (IdentityMisc) is added/updated.
--------	--------------	--

GAW051	Indiana Send Locator Message SJ	Sends a message to a user when a person changes a locator screen (IdentityMisc) to Sick/Vacation/Other.
GAW130	Add to Overtime	Automatically adds an additional overtime amount to whatever the user had entered.
GAW134	Send Message for Usage	Sends a message to all parties requested when a particular time code is used.

G&W Programming Rules – FOR INFORMATION ONLY

GAW001	Cancel Events	Cancels future events if the current status of the case is now closed. Events are only cancelled if this is the only case tied to the event. Otherwise, references to this case are simply removed from the event. Of course, the user must be authorized to perform those tasks or the rule won't work.
GAW002	Close Case	Performs close case processing if the current status of the case is now closed. This entails putting end dates on case names, case assignments and deadlines. Of course, the user must be authorized to perform those tasks or the rule won't work. If the status is inactive instead of closed, only case names and assignments will receive end dates.
GAW003	Format Cause	Determines whether or not to use cause number or petition numbers.
GAW006	Get Latitude Longitude	Performs the logic necessary to access some mapping interface to get the latitude/longitude for an address.
GAW007	Log Event	Logs the current event to the EventLog database table. This rule was written with the intent of providing a method to log who adds, updates or deletes database records. It is not meant to provide any kind of rollback database capabilities, but simply to log who has done what. Primarily, it's purpose is to

		log who deletes Identities and Cases; however, it is written generically enough to work for any object.
GAW008	Log Signons	Logs sign on/sign off requests and performs special processing associated with logging on/off.
GAW009	Notify GAW	Used to send emails to G&W when various events happen.
GAW010	Notify Quest Administrator	Used to send emails to the Quest Administrator identified in the quest properties file when various events happen.
GAW067	Log View of Documents	Adds a DocumentNotes entry whenever the person who is assigned to a document views it.
GAW068	Track Document Assignments	Adds a DocumentNotes entry whenever a document assignment changes.
GAW073	Log Changes	This rule adds a GAWLog entry tracking when and where it is used. It reports the user and IP address involved as well the usage, key, and to string of the object.
GAW077	Validate Address	Validates an address against the United States Postal Service database.
GAW091	Indiana Secure Photos	Secures a person's photo by ensuring the rules as follows: 1) If user from PROB' agency, then they can view all photos. 2) If user is from 'PROB' division, then they can view all photos. 3) If anybody else, the child must be 14 at the time of an incident with a felony statute.
GAW096	Tennessee Generate Petition Number	Generates the petition number for a filed statute if a number was not provided.
GAW097	Add Filed Statute	Automatically adds a filed statute when an incident statute is added.
GAW104	Incident to Dispo Date	This rule forces disposition date on a filed charge to be greater than or equal to the earliest incident date on the case.
GAW105	Tennessee Generate Cause	Generates the cause number for a filed case if a number isn't currently assigned.
GAW110	Tennessee Format Cause	Places the dashes in the correct position of Tennessee cause numbers and then sets the formatCause field of the object.
GAW111	Tennessee Fix Cause	Expands the cause number input by the user into a valid cause number.
GAW115	Indiana State Code URL	Builds an external URL that links to a state of Indiana website for the passed Statute and then sets the stateCodeLink field of the object.

GAW145	Indiana Notify EFM	Notify the Tyler EFM when a case known by the EFM is sealed and/or expunged.
GAW149	Validations	Validates various database objects. At the moment, it works for OtherIDs.
GAW152	Log new Messages	This is meant to automatically log messages in XML format to a log file in /temp. The file name will be in the format JURISDICTION-Messages-year-mm-dd.xml.
GAW154	Florida Format Cause	Places the dashes in the correct position of florida cause numbers and then sets the formatCause field of the object.
GAW027	Florida Fix Cause	Expands the cause number input by the user into a valid cause number.
GAW028	Florida Generate Cause	Generates the cause number for a filed case if a number isn't currently assigned.
GAW032	Maryland Format Cause	Formats petition numbers. Adds the initials of the assigned MASTER.
GAW033	Maryland Generate Except Doc	This rule will generate an EXCEPTION ORDER document if the current document being updated is being changed from 'pending approval' to 'exception filed'.
GAW034	Maryland Generate Family ID	Generates the family ID if it isn't already entered.
GAW035	Maryland Generate Petition Number	Generates the petition number for a filed statute if a number was not provided.
GAW036	Maryland Validate Jail ID	Validates that the Jail ID is entered after the **WRIT on address line 1.
GAW042	Indiana Fix Cause	Expands the cause number input by the user into a valid cause number.
GAW043	Indiana Format Cause	Places the dashes in the correct position of Indiana cause numbers and then sets the formatCause field of the object.
GAW044	Indiana Generate Cause	Generates the cause number for a case if a number isn't currently assigned.
GAW045	Indiana Generate Petition Number	Generates the petition number for a filed statute if a number was not provided.
GAW066	Indiana Marion Co PD	This rule contains all the custom edits and processes for the Marion County Public Defender system.
GAW088	Florida Get Census Info	Performs the logic necessary to access the Miami-Dade GIS system to get the census tract (geocode) for an address.
GAW154	Florida Format Cause	Places the dashes in the correct position of florida cause numbers and then sets the formatCause field of the object.
GAW131	Florida Secure Case Bays	Secures a case for BAYS.
GAW049	Indiana Secure Drug Court	This is a security rule designed to limit access to Drug Court related objects (secured objects). Access to Drug Court is

		defined by the authority granted to the Requirement type assigned to the drug court program.
GAW062	Indiana Force Event ID for Doc	It prevents the adding or updating of the document object if the user is from the OFC groupID and there's not an eventID tied to the document.
GAW052	Indiana Send Trial Msg SJ	Sends a message to COROMA and ANTENN when a trial is scheduled for a JD/JS case.
GAW046	Indiana ICJI	This is meant to act as a trigger to automatically add the corresponding EventLog record to the database whenever an action that should update the Log of Juveniles Held happens.
GAW075	Indiana St Joe Events	This rule is designed to prevent a prosecutor in St Joseph County from adding/updating a court event for any court except 4.
GAW041	Indiana Auto Seal Case	Automatically seals an adoption case.
GAW048	Indiana Secure Case	Grants or revokes access to cases based upon specific conditions for Saint Joseph County, Indiana.

Interfaces

GAW005	Get IMS Scanned Documents	Interfaces with the IMS imaging system to retrieve documents and insert them into the Documents array being created.
GAW012	Repository	This is meant to act as a trigger to automatically add the corresponding EventLog record to the database whenever an action that should update the repository happens. In general, this should be used for any item referenced on the identity or case detail screens.
GAW013	Secure Add By Me	This rule is designed to limit updates and deletes to GAWDBObject objects to the person who added the object. A NotAuthorizedException is thrown if an attempt is made to update or delete a GAWDBObject object by anyone other than the person who added the object.
GAW018	SigPlus	This rule is used to process the exit points in the electronic signature capture and display process.

GAW054	Interfaces Log Drug Requests	Logs all drug test requests to the outgoing interface file.
GAW055	Interfaces Get In Out SJ	Reads St Joe's time keeping application to determine whether that system thinks the person is in or out. If the time keeping disagrees with the record in Quest, we'll override Quest to show what time keeping says.
GAW056	Interfaces Get Yasi Documents	Retrieve all YASI created documents from the YASI server and place them into the GAWParms searchDocuments TresSet.
GAW080	Interfaces MD Warrants	Send a warrant to the state of Maryland. This is a live link, so if it fails, the warrant can't be added.
GAW122	Document to Event Log	This is meant to add an EventLog entry whenever a document of a specified type is completed. It's the interface to JTAC for the PI/PDR.
GAW132	Interfaces Update BI for Requirements	Updates BI Electronic Monitoring system when the requirement status changes to active or the requirement is ended.
