

Show scanned document before Quest document

What it does:

Allows you to view the scanned image before the Quest document. This is helpful when you create a certificate of service for a scanned order. When you click VIEW you want to see the scanned order, not necessarily the certificate.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: SCANNEDFIRST

Short description:*

Long description:*

Active:* Yes No

Notes:

Set the short description to 'Y' to show the associated scanned document prior to showing the Quest document in the batch notice output. Set it to 'N' to show the Quest document first.
