# UserIDs that can be scheduled

What it does:

This table allows you to set up equipment and rooms that can be scheduled. You set up each piece of equipment and each room, such as projector and Basement Training Room, as a person in Quest with a UserID. You can then schedule appointments indicating that training will be held in the basement training room and you will be using the projector.

Adding the table entry

Menu | Tables | Generic Validation Tables |

- **Code** – Code must be the UerID associated with the identity that can be scheduled.
- **Short description** – The short description can be up to 15 characters.
- **Long description** – The long description can be up to 50 characters.
- **Grouping** – If specified, all ids with a given grouping will be grouped together on the screen. All groupings can be defined in the AttributeGroups table if you want descriptions displayed for each grouping.

Click the **Update** button to save your work.
