

Default service type for notices

What it does:

Allows you to specify the service type the Document Detail Notices section will display when notice is sent by batch notice like print pending notices.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: [SERVICETYPE_N](#)
Short description:*
Long description:*
Active:* Yes No

On the Document Detail screen, when you run the [CreateBatchNotices](#) (print pending notices) report, the short description should be the [ServiceType](#) code that you want displayed.
