

Show Add Incident on person detail screen

What it does:

Allows you to remove the Incidents 'Add' link from the Person Detail screen. If an incident is added off the Person Detail screen, the user may forget to click to which case it should be attached. If this causes problems, you can simply remove the add link.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: `SHOWADDINCIDENT`

Short description:*

Long description:*

Active:* Yes No

Notes:

On the person detail screen, should we show the link to 'add incident' if the user is authorized? This helps prevent users from adding incidents for a person instead of a person's case. 'Y' in short description for 'yes', 'N' for no.

+ Cases	Top	Add
+ Incidents	Top	
+ Active warrants	Top	
+ Aliases	Top	Add
