

Security Threat Group (STG) Dashboard

[Watch Video](#)

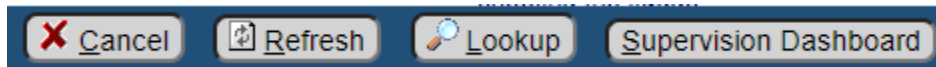

This dashboard was developed and paid for by Allen County, Indiana. This Dashboard is all about safety and identifying potential threats to the children regarding gang activity or human trafficking for example. It can also be used to identify potential threats to the building and the staff. If you can identify potential threats you can be proactive in addressing them.

This is a new area in Quest that is in the development stage in Allen County. They are working through their processes and how they will use this, but it is available to everyone right now. What threats or security issues are you seeing in your county?

You can get to the dashboard from **Menu | Supervision | Dashboard** or from the eyeglasses link.

From the dashboard you can switch between the STG dashboard and the Supervision dashboard. Whichever dashboard you look at last will be the dashboard you will be on when you go to dashboard next time. All Quest users have authority to the dashboards.

This has a separate Contacts area for these security/threat issues. You could have a special contact type called STG Contact for example and that contact type can be secured so only those with specific authority could add or view those types of contacts.

We can now add attributes to contact notes and pull reports on those attributes.
