

Default template name used for subpoenas/notices

What it does:

Allows you to specify the name of the template that should be used for batch processing subpoena/notices.

Adding the table entry

Menu | Tables | Generic Validation Tables | Defaults

Code: SUBPOENADOC

Short description:*

Long description:*

Active:* Yes No

Notes:

The short description should be used to identify the template used for creating notices when subpoena/notice requests are issued. This default value can be overridden by specifying a template for an event type (in the EventType table).
