

Transaction Journal

Report Description:

This report will list every transaction that matches the selected transaction type. You can run by transaction date or date added. You can run every transaction or only specific types of transactions, such as adjustments or voided transactions.

Running the Report:

Enter the beginning and ending date.

Transaction Journal

Enter report criteria and press "Submit"

From date:* 

To date:* 

Only include voided transactions:* Yes No

Find by Date Added:* Yes No

Include non-monetary transactions: Yes No

The find by date added is helpful if instead of searching for the transaction date, you can search for everything added yesterday for example.

If you include non-monetary transactions, you can include such items as community service hours.

The Report:

The report will produce a .pdf report as well as a .csv spreadsheet.

The report will show the debit and credit entries of every transaction. The total at the bottom is the total of all the debits and all the credits. These totals should equal or there should be an explanation of why they don't.

Where the data comes from:

This is reporting every transaction that matches the report settings that took place during the reporting period.

The setting "trace" allows you to trace the transactions for a specific person ID.

By setting the "transType" you can create multiple transaction journals, for example, one for just adjustments and one for all transactions.

Report Settings:

```
# trace.1=27010
```

```
# -- Required settings --  
class=equest.app.reports.TransactionJournal  
jobQ=batch
```

```
# limit to type(s) (all if not specified)  
# transType.n=????  
# where ???? is one of the following:  
# ASR - Assessment  
# ADJM - Adjustment on multiple requirements  
# DCR - Debit/Credit
```

DCRM - Debit/Credit on multiple requirements
PMTR - Payment
PMTM - Payment on multiple requirements
GENJ - General journal entry
DEP - Deposit
DIS - Disbursement preparation
CHKR - Check on single requirement
CHKA - Check from an account
CHKM - Check on multiple requirements
